

# WHICH TREES?

Some trees can live in places with different amounts of shade, animals or soil wetness. Other trees are more particular. Below are the preferences of eight different Oregon forest trees. The numbers show the levels each tree can live with (1=low tolerance and 5=high tolerance).

**Directions:** Use the information below to find trees that might grow at your site. Circle the best matches. Remember to choose trees that would do well with your site's level of shade, animals *and* soil wetness.
